An Introduction to Portable Devices: A Pathfinder

Plainfield Public Library Pathfinder

October 2010

Overview Commentary

Are you intrigued by the explosion of technology in the past decade but also thoroughly confused by the sheer number of options in portable devices available to you? Perhaps you believe a portable device would be of use to you on a daily basis but you are perplexed as to which one(s) might be a perfect fit for your needs. Or maybe you cringe when you see the terms your children type when using their texting devices, but you've determined to brush up on the lingo they use. Maybe you've decided that you simply don't want to carry around that bulky oversized calendar in your purse anymore or drag those heavy CD players around your waist when you go to the gym? Is there any way to get your calendar or music in a more compact size?

Whatever your interests or needs, *The Plainfield Public Library* can help you out, whether it's simply to understand the technology or to dive headlong into the technological boom of the first decade of the 21st Century!

Good Luck and Have Fun !

Today's generation of PDAs are generally called *smartphones*. They are multipurpose devices for cell phone and email use, as well as storing personal organizing data such as appointment calendars and to-do lists. The monitors of these devices are icon-oriented touch screens for ease of use.
